

Pull rings for Xavier's Second Skin Suit

Xavier has Cerebral Palsy and needs a Second Skin Dynamic Up Suit to assist him with every day activities. Xavier also suffers from a sensory processing disorder, and the suit provides him with stability and spatial awareness of his body. As you can see Xavier has had a suit for many years, and the benefits have been outstanding. The cost of the suit is substantial and each year Xavier requires a new suit. If you or your organisation can help by collecting the aluminium pull rings off drink cans so that they can be recycled to pay for his suit it would certainly help. For more information please contact the person who gave you this flyer or call on the number below.
